1

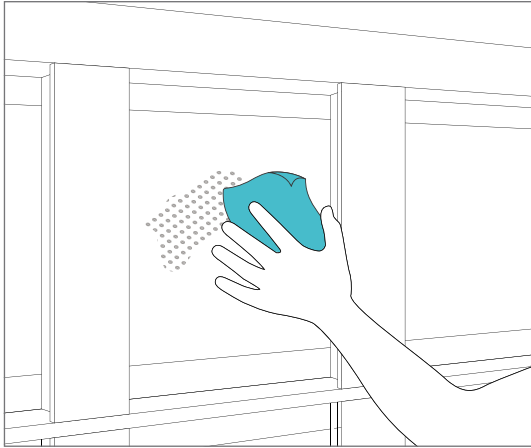

Peel off the sticker.

2

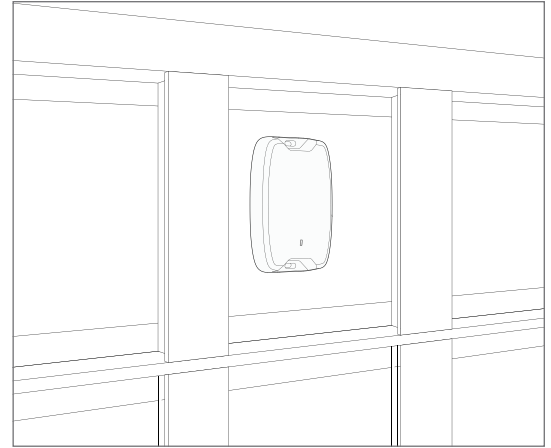

**To activate, use the provided pin to press the button underneath for 1 second.
The light will turn green when the device is activated.**

3

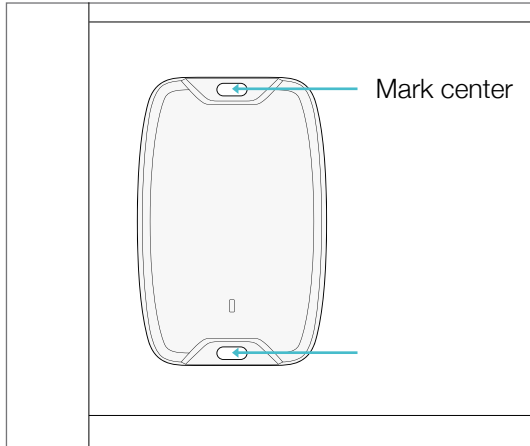

Use the provided alcohol wipe to clean the install surface.

4

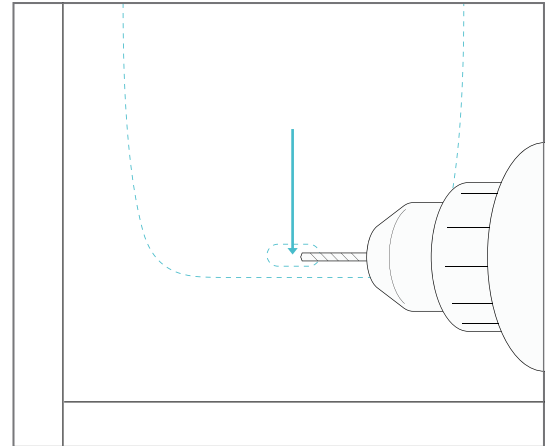

Place and hold the device where you would like to mount it.

5

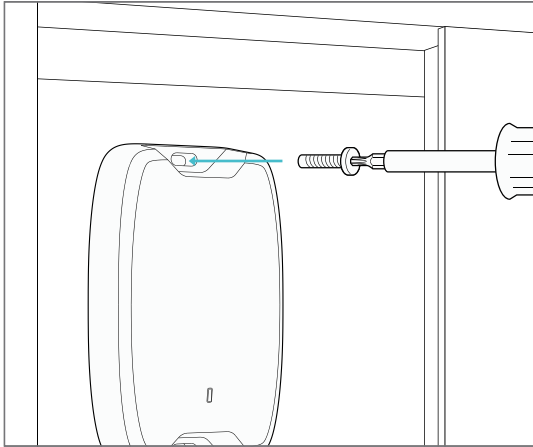

Mark the location for the screws using the holes in the product.

6

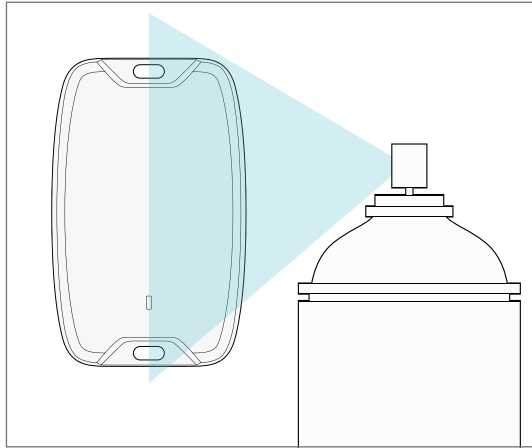

Remove the tracker, and drill small pilot holes.

7

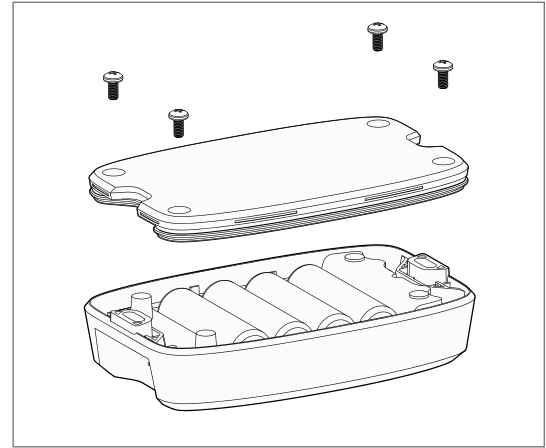

Replace product and screw down with the included anti-theft bit.

Installation Tips

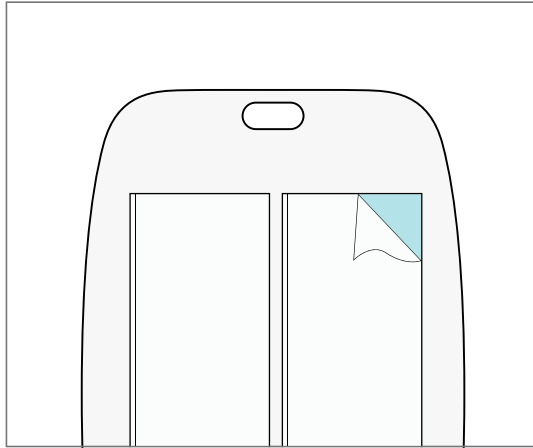

Spray painting the device to camouflage it is fine, however it's recommended you do not use a metallic paint which might interfere with antenna performance.

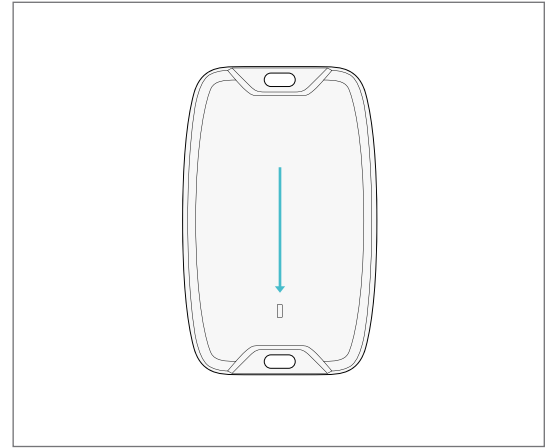

The batteries are replaceable. You can replace the batteries using Li-SOCL2 batteries which are easily purchasable online, we recommend SAFT brand LS14500 batteries.

Installation Tips (cont'd)

To attach the device without using screws (for example, if you are mounting the device on a curved surface) use the provided VHB adhesive tape.

The ideal orientation for the device is vertical with the LED indicator on the bottom.
