

# Certification of Calibration

Sep.15<sup>th</sup>, 2023

The certification applies to CT7117 series of devices as furnished by Sensylink.

In Order to insure the datasheet specifications and any agreed-upon customer specific requirements are met, the sensor is calibrated under controlled temperature and relative humidity conditions.

The calibration is completed using equipment calibrated on a regular basis by a laboratory certified to operate in accordance with ISO/IEC 17025, is a member of the international Laboratory Accreditation Cooperation (ILAC) and is a signatory of the ILAC Mutual Recognition Arrangement (MRA).

The temperature and humidity standards (transfer standards) used for calibration are traceable via the accredited laboratories to standards set by the National Institute of Standards and Technology (NIST)
