Installation

1

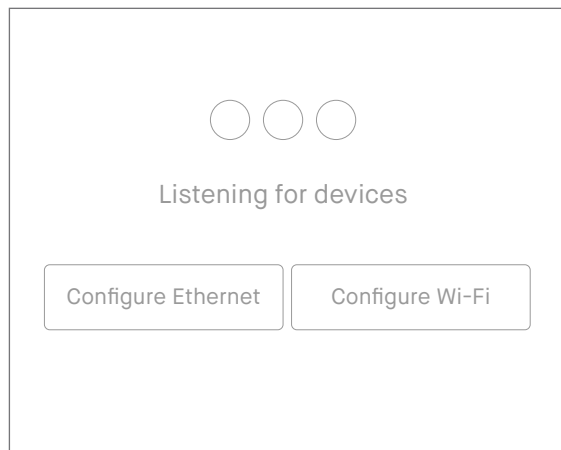

Mount the HMI using the included stencil.

2

Connect the HMI to the power supply and press the power button.

3

Select how you would like to connect your device.

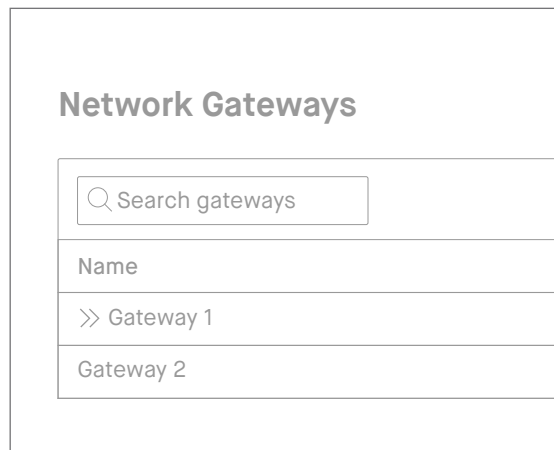

Configure Ethernet

Ensure the HMI is connected to an active network via the ethernet port. Turn on ethernet, then hit the back button.

Configure Wi-Fi

Turn on Wi-Fi and select your network. Enter the password for the network, select 'Connect', then hit the back button.

4

Choose the device you would like to use with your HMI. That device's local dashboards will now be available under the 'Dashboards' tab.
