Samsara for Oil & Gas

SOLUTION OVERVIEW

SAMSARA FACTS

10,000+ customers worldwide

200,000 new devices added annually

Offices in San Francisco, San Jose, Atlanta, and London
A Complete Platform for the Oil & Gas Industry
Samsara offers a complete, easy-to-use platform to improve efficiency, safety, and sustainability across operations.

**CONNECT EVERY ASSET**
Hardware connects existing controllers and SCADA systems, and Mobile Forms bring pumper-collected data into the cloud in real-time giving you a single, unified view of your oilfield.

**BUILD CUSTOM DASHBOARDS**
Integrate and visualize real-time and historical data in easy to build dashboards and reports. Easily create multiple views and share them with an unlimited number of users.

**MAXIMIZE EFFICIENCY AND SAFETY**
Minimize downtime and the safety impact of production issues with real-time alerts via text, email, and phone call. Respond quickly with the ability to adjust asset setpoints remotely.
SAMSARA FOR OIL & GAS

Real-time visibility and control from production to pipeline.

Samsara is an Industrial IoT company that provides oil and gas companies with end-to-end data visibility, mobile forms, alerts, and control using industrial gateways with built-in LTE connectivity, sensors, and the Samsara cloud dashboard—all integrated in a flexible, easy-to-use platform.

Customers trust Samsara’s technology to drive business outcomes across remote sites: to help them consolidate their data so they can minimize downtime, reduce worker and environmental safety risks, optimize production, and improve the overall efficiency of their operations.
CASE STUDY

Buffalo Head Energy Services

Samsara makes it easy for Buffalo Head to respond to issues in the oilfield in real-time with reliable alerts.

➤ **Flexible dashboards** allow Buffalo Head to easily create custom views of their clients’ operations in a matter of minutes.

➤ **Open platform hardware with pre-provisioned cellular** connects a wide array of industrial site hardware directly to the cloud in minutes drastically cutting integration time.

➤ **Easy to configure alerts** help Buffalo Head prevent unplanned downtime and failures on mission critical equipment.
Samsara has become a seamless data broker for disparate systems in the oilfield. Any system that’s out there, we can integrate with it, transmit that data, and provide wireless remote monitoring of assets that we would otherwise not be able to.

— MARC LAWSON
General Manager
Combining Hardware, Software, and Cloud in a Complete Platform

Industrial Controller
Includes pre-provisioned LTE cellular service that brings your remote site data directly to the cloud, local data storage, control, and is fully interoperable with existing controllers.

Cloud Dashboards
Simple and intuitive dashboards to visualize operational data in real-time. Drag-and-drop tools make it easy for anyone to build graphical or metric dashboards.
Seamless Integration, Easy to Deploy

**IG41 Industrial Controller**

Centralized data collection, built-in LTE cellular service, secure communication, onboard data processing, and local control

Connect via modular I/O or through existing PLCs and control systems (Modbus, Ethernet/IP, ROC, CAN)
Long-range wireless data collection for hard to reach assets and sensors with analog and digital input/outputs

WM11
Wireless I/O Module

Wired power monitoring sensor to analyze consumption and efficiency for power-intensive equipment

PM11
Power Monitor

Wireless, real-time vibration and surface temperature sensors for critical industrial equipment

HM11
Machine Health Monitor
SOFTWARE

Feature Highlights

**MONITORING**
Gain remote, real-time visibility into operational data like pressures, flows, and levels to reduce on-site visits

**MAPS & METADATA**
View assets in interactive maps and add customizable asset data like model number, installation date, and more

**OPEN API**
Collect data directly via API in real-time or automatically send operational data to enterprise apps to improve back-office efficiency

**ANALYSIS**
Identify the root cause and quickly resolve issues by comparing data across assets and sites over time

**REPORTS**
Simplify compliance reporting with instant access to downloadable reports on historical data

**FORMULAS**
Drive continuous improvement efforts by calculating and visualizing key performance indicators (KPIs) in real-time

**ALERTS**
Minimize downtime with easy to configure alert notifications for emails, texts, or phone calls

**MOBILE FORMS**
Replace paper-based logs and data collection by providing pumpers with mobile forms that automatically sync with the dashboard

**CONTROL**
Enable pumpers to respond to leaks, drops in pressure, and other issues instantly with remote control of setpoints and on/off switches
Improve efficiency and reduce liability with a constant, real-time view on the status of assets spread across remote oil and gas sites.

➤ Real-time visibility across the oilfield with telemetry and mobile forms
➤ Easily create custom alerts to prevent potential liabilities
➤ Streamline reporting for compliance and regulation
What makes Samsara noteworthy is their prioritizing how sensor data can increase the safety and efficiency of physical operations, contributing to productivity gains while reducing costs.”
