

Privacy Button

Data Sheet

OVERVIEW

The Privacy Button is an easy-to-use accessory that allows drivers to turn location and GPS tracking on and off when conducting personal activities. When pushed, the button immediately turns off all location tracking from the vehicle. This is an accessory for the Vehicle Gateway.

HIGHLIGHTS

- Upon pressing the Privacy Button, exact GPS coordinates of the vehicle are turned off
- Fleets with Vehicle Gateways have access to the privacy button
- A Legal alternative to the widely used “Jammer” devices that prevent GPS signals from telematics devices (Illegal in the UK)

**Interested in joining early access?
Contact your Sales rep to be added.**

[Requires Samsara Vehicle Gateway and license, sold separately.](#)

SPECIFICATIONS

- **Privacy Concerns:** Customers can press the button to turn on or off the GPS tracking of their vehicles. GPS turns on automatically when a trip terminates or the vehicles engines turns off. Fleet managers are not alerted when Drivers turn on/off their Privacy button
- **Monitor:** Track the amount of time the Privacy button has been enabled during their hours of service
- **Easy to Access Button:** Customers can easily identify whether the Privacy button is enabled due to it's larger size. A visible LED light lets drivers know when it's engaged
