What’s included:

1x Magnet

1x Sensor
(adhesive attached)

4x Screws

Questions? samsara.com/support
**Roll-Up Door**

1. Discard magnet.

2. Place sensor on inside of door, as high as possible.

3. Secure with included adhesive. Screw if desired.

* Note: If using your own screws, make sure they're non-magnetic.

**Swing Door**

1. Place magnet on edge of door.

2. Place sensor on wall, arrow toward door.

3. Secure with included adhesive. Screw if desired.

Note: Max distance between sensor and magnet is ½ inch. Light blinks when aligned.
