

Increase Fleet Efficiency and Safety with Samsara Driver ID Tokens

[Try Samsara for Free](#)

Introduction

Full visibility of driver behavior, location, and driving time, no matter which vehicle they're driving:

Instant Accountability

Gain visibility into driver behavior to help them drive more safely.

Zero-Touch for Drivers

Wireless and automatic, no key cards, personal codes, or driver input.

No In-Vehicle Readers to Install

100% wireless design eliminates expensive readers and complex wiring.

Samsara Driver ID

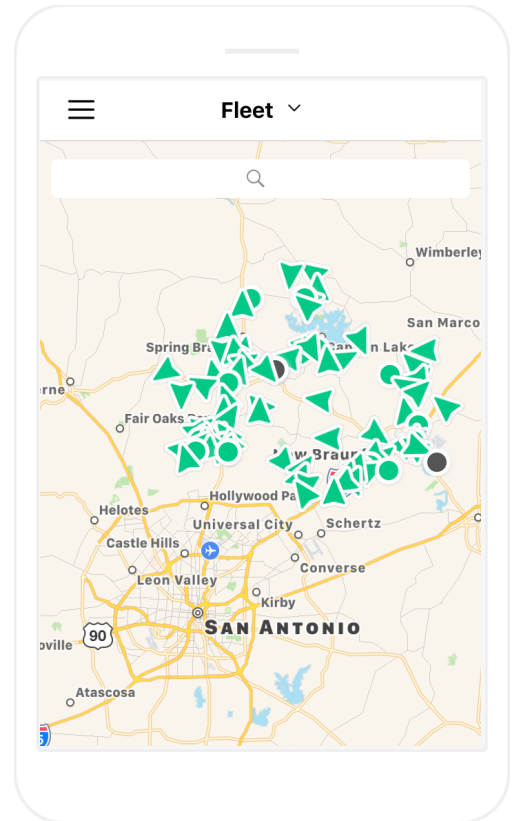

How It Works

- Each driver carries a Driver ID token (on their keychain)
- Token is detected automatically by the Samsara vehicle gateway
- Vehicle and driver are paired until driver leaves vehicle
- Driver ID differentiates drivers from passengers

Monitor Drivers in Real-Time

- Pinpoint real-time driver location
- Alert driver of missed routes and unsafe driving behavior
- Warn about check engine light or low fuel
- Prevent unauthorized vehicle use and theft

View Driver Safety and Trip History

- Full visibility of driver safety, including speeding, harsh braking, and rapid acceleration
- Time-stamped trip history identifies inefficient routes and unnecessary detours
- Driver ranking shows safest and most efficient drivers

GMT-2932	Al Smith	Car Phone Warehouse	Oct 31st, 6:53 am	Crane and Tool	Oct 31st, 8:00 am	1h 6m

Affordable and Easy to Use

Samsara Driver ID tokens eliminate the hardware cost and installation complexity of traditional driver ID solutions. Since the ID tokens automatically sync with Samsara Vehicle Gateways, there's no reader to purchase or install—just give the ID tokens to your drivers. When a driver enters a vehicle, the token is identified, and the vehicle's actions are automatically attributed to the correct driver.

While traditional driver IDs require reader hardware, which typically require drilling holes through the dashboard and can cost thousands of dollars when deployed fleet-wide, Samsara is simple and affordable. Moreover, there's no burden for drivers - by simply carrying the token in their pocket or work bag, their presence in the vehicle is detected, without “badging in”, entering codes, or error-prone actions.

- **No reader hardware to install**
- **No software license fees**
- **No driver action required**

Driver ID is part of Samsara's complete solution to improve fleet productivity, ensure compliance, and lower operating costs.
