SAMSARA MACHINE VISION FOR

Pharmaceuticals & Medical Devices

The Leading Platform for Connected Operations
A Complete Machine Vision Platform for Pharmaceuticals and Medical Devices

From package and traceability compliance to liability for patient safety, quality is core to the success of pharmaceutical and medical device manufacturers. At the same time, higher R&D costs and growing competition have placed a spotlight on production efficiency.

While many manufacturers utilize machine vision to solve quality, traceability, and compliance challenges, these systems have historically been difficult to set up, maintain, and update. Samsara's VS2 series simplifies the machine vision experience by combining powerful hardware with a truly intuitive user interface. Coupled with an integrated traceability database and an array of flexible inspection tools, the VS2 series offers a complete solution for efficient automated inspections in the pharmaceutical and medical device space.
QUALITY MANAGEMENT
Reliable inspections of every produced component ensures product quality, patient safety, and complete production records.

OPERATIONAL EFFICIENCY
Real-time defect alerts and integration with automated systems help catch defects sooner, reducing rework and scrap costs.

BUILT-IN COMPLIANCE
Out-of-the box traceability reporting, role-based access control, and 21 CFR Part 11 compliance help you adhere to critical safety regulations.
APPLICATIONS

Solve key business challenges

PACKAGING INTEGRITY
Ensure safety seals and caps are present and properly placed. Check that blister packs are fully intact with no damaged or missing capsules.

LABEL ACCURACY
Verify that labels are accurate and contain all information required for compliance. Ensure print quality of text and barcodes, and confirm the attachment of additional instructional leaflets.

PRODUCT QUALITY
Confirm that products are consistent in appearance and size before packaging. Detect the presence of particulates and broken tablets.

TRACEABILITY
Read and verify the accuracy of 1D and 2D barcodes, text, and numbers printed on labels, cartons, films, and other surfaces. Automatically and securely log data to create an audit trail in the Samsara dashboard.
The Samsara advantage

➤ **FASTER SETUP**
Start inspecting your products with configurable, code-free tools.

➤ **ANYWHERE, ANYTIME**
Seamlessly manage your entire inspection process with our central dashboard.

➤ **TOTAL VISIBILITY**
Analyze real-time and historical production data with integrated traceability.
Assembly Verification

Check that caps and other accessory components are present, intact, and aligned to the primary product.
Pill Count

Ensure that blister packs and other containers are assembled with the right number of pills.
Verify that each pill is fully intact with no breaks or cracks.
Expiration Date & Lot Code

Read and verify that the correct best by and expiration dates are printed on all containers, packing, and leaflets. Read lot codes for traceability through the supply chain.
Seal Check

Verify that safety seals are present and intact on bottles or any other containers.
Tools for every inspection

➤ Label Verification
➤ Traceability
➤ Fill Level
➤ Vial Inspection
➤ Best By Date
➤ Batch & Lot Codes
➤ Case Labels
➤ Packet Counts
➤ Safety Seal Inspection
➤ Package Insert Detection
➤ Capsule Size
➤ Pill Color Verification
➤ Broken Pill Checks
➤ Vial Counting
➤ Injection Molding Defects
