

ATMOS[®]

The world's first and only
**patented mobile device
heating & cooling system**

Are your tablets shutting down from overheating or extreme cold? Our patented technology prevents overcooling and quickly restores overheated tablets to working condition, even when drivers leave their devices in the vehicle overnight or all day.

Heating & Cooling Element

Automatically maintain your device's ideal operating temperatures to avoid downtime.

Distraction Free

Hands-free communication with optional PTT system that includes speaker, DOT compliant palm-mic, and 20 watt amplifier.

Smart Charging

Smart power supply with ignition sense prevents overcharging.

Easy Access

Spring-loaded for reliable mounting and rapid docking and undocking.

Secure Key Lock

Optional push-button key lock keeps the device secure when away from the vehicle.

Magnetic Charging

Industry leading patented magnetic charging that maintains charging integrity even in high vibration environments

GPS LOCKBOX

Why we are different.

We are proud that you have shown interest in GPSLockbox. Here are a few reasons that make us different. We think that you will be impressed with our quality as well as our customer service.

ATMOS - Patented temperature regulated cradle broadens the operating temperature of the device, protects the lithium battery which can extend battery life and the tablets life-cycle. We help to keep you working in all climates when others have failed.

WIRING HARNESS - NAC tested and approved wiring harness for dedicated power management. This smart wiring harness has the ability to continue to charge your tablet for 90-minutes after the ignition is turned off.

3-YEAR WARRANTY - Our industry leading advance replacement warranty provides full coverage for any manufacturing defects for 3 years. If something needs replaced, GPSLockbox will send you the replacement part right away.

MAGNETIC CONNECTION - GPSLockbox utilizes both pogo-pins and high powered magnets to insure a secure connection for improved charging and data transmission, even on the bumpiest of roads.

CASE - The Flex II patented magnetic charging case with its durable ABS plastic and soft rubber coating is built to withstand the rigors of frequent use in fleets across many different industries. They provide drop protection along with the added security of the hand-strap for use outside your vehicle. They are designed to fit the Flex II in-vehicle cradle system.

CRADLE - The Flex II Locking Cradle is a robust spring-loaded design engineered to firmly hold the Flex II Case for tablets. Improved charging capabilities add to driver safety, and satisfies the DOT mounting requirements for ELD devices.

PUSH-TO-TALK (PTT) - When communications can't wait. GPSLockbox can transform your tablet into a communications device by adding a 20W amplified speaker and a DOT compliant corded palm-mic. Stay connected, stay safe, and stay compliant.

ACCESSORIES - We can also supply a full line of universal mounting and charging accessories for just about any device and any vehicle type from trucks to forklifts to bicycles.

INSTALLATION TEAM - We have staff that can install, deploy, and support our equipment as well as other solutions in your vehicles. We have installed fleet and telematics devices, cameras, antennas, and other mounting systems.

If you have any questions or would like to place an order, please call us at **(844) GPS-LOCK (477-5625)** or via email, at onlineorders@gpslockbox.com. We are looking forward to working with you.
