

Privacy Button

Data Sheet

OVERVIEW

The Privacy Button is a simple, intuitive accessory that allows drivers to temporarily disable GPS and location tracking when conducting personal activities. When pressed, the button immediately suspends all location tracking from the vehicle. This accessory is designed for use with the Samsara Vehicle Gateway.

HIGHLIGHTS

- When the Privacy Button is greyed out/unlit, GPS coordinates from the vehicle are no longer transmitted.
- Available for fleets equipped with Vehicle Gateways.

HARDWARE

MATERIALS: Polycarbonate

SIZE: 50 mm diam x 16 mm height

WEIGHT: 78 g **CABLE LENGTH:** 2.3 m

TEMPERATURE RANGE: -40 to 85°C

MOUNTING MATERIAL: 3M VHB Heavy Duty Adhesive

SPECIFICATIONS

Privacy Controls:

Drivers can press the Privacy Button to enable or disable GPS tracking for their vehicle.

GPS tracking can be configured to automatically restart when a new trip begins or when the vehicle engine restarts.

Fleet managers are not alerted when drivers enable or disable privacy mode.

LED Indicator:

The indicator light on the Privacy Button reflects the current GPS tracking status.

- When the indicator is illuminated, GPS tracking is active and location data is being transmitted.
- When the indicator appears greyed out or unlit, GPS tracking is disabled and location data is not being shared.

Monitor:

The Privacy Sessions report can be used to track the amount of time the Privacy Button has been enabled during drivers' hours, providing visibility into privacy mode usage and ensuring operational transparency.
